C.A. No. 2:16-cv-613

Jury Trial Demanded

COMPLAINT FOR PATENT INFRINGEMENT

Plaintiff Nichia Corporation (“Nichia”), by its undersigned counsel, with knowledge as to its own acts and status, and upon information and belief as to the acts and status of others, for its Complaint against defendants Lowe’s Companies, Inc. (“Lowe’s”) and L G Sourcing, Inc. (“LGS”), alleges as follows:

PRELIMINARY STATEMENT

1. This is an action for patent infringement under the United States patent laws, 35 U.S.C. § 1, *et seq.* The accused products are LED lighting products that are imported into the United States, and/or made, used, sold, and/or offered for sale, in the United States, in the State of Texas, and in this judicial district, by defendants Lowe’s and LGS. The LED devices in the accused lighting products infringe at least claims 17, 19, and 21 of U.S. Patent No. 8,530,250 (the “’250 Patent”), which is owned for all purposes by Plaintiff Nichia.

2. In a previous lawsuit, this Court held that LED devices manufactured by Everlight Electronics Co., Ltd. infringe, among other claims, claims 17, 19, and 21 of the ’250 Patent. As set forth in detail below, the LED lighting products accused in this lawsuit incorporate LED

devices that, insofar as relevant to the claim limitations, have the same features as Everlight LED devices previously found to infringe the '250 Patent. By this lawsuit, Nichia seeks relief for Lowe's and LGS's past and ongoing infringement of Nichia's '250 Patent by virtue of their sale, offer for sale, and importation of infringing LED devices.

THE PARTIES

3. Plaintiff Nichia Corporation is a corporation organized and existing under the laws of Japan, with its principal place of business at 491 Oka, Kaminaka-Cho, Anan-Shi, Tokushima, Japan 774-8601.

4. Defendant Lowe's is a corporation organized and existing under the laws of the State of North Carolina with its principal place of business at 1000 LOWE'S Blvd., Mooresville, NC 28117. Lowe's may be served with process by serving its registered agent, Corporation Service Company, at 327 Hillsborough Street, Raleigh, NC 27603.

5. Defendant LGS is a corporation organized and existing under the laws of the State of North Carolina with its principal place of business at 1605 Curtis Bridge Rd., North Wilkesboro, NC 28659. LGS is a wholly owned subsidiary of Lowe's. LGS may be served with process by serving its registered agent, Corporation Service Company, at 327 Hillsborough Street, Raleigh, NC 27603.

6. Lowe's sources and acquires the products that it sells at its nationwide retail outlets through LGS. LGS sources those products from over 500 vendors in 21 countries, primarily in Asia. As part of this arrangement, Lowe's and LGS import into the United States, and sell and/or offer for sale at Lowe's retail outlets nationwide, including in the State of Texas and in this judicial district, lighting products that contain light-emitting diode ("LED") devices.

JURISDICTION AND VENUE

7. This Court has subject matter jurisdiction over this action pursuant to 28 U.S.C. §§ 1331 and 1338(a).

8. Lowe's and LGS are subject to personal jurisdiction in this judicial district because each of them is present within, has minimum contacts with, and regularly conducts business in, the State of Texas and the Eastern District of Texas.

9. Venue is proper in this judicial district under 28 U.S.C. §§ 1391 and 1400(b).

10. Among other things, Lowe's and LGS have purposefully availed themselves of the privileges of conducting business in the State of Texas and in this judicial district; Lowe's and LGS have sought protection and benefit from the laws of the State of Texas; Lowe's and LGS have solicited business in, transacted business within, and have attempted to derive financial benefit from residents of the State of Texas and this judicial district; and Nichia's cause of action arises directly from Lowe's and LGS's business contacts and other activities in the State of Texas and in this judicial district.

11. More specifically, the accused LED lighting products have been imported into, offered for sale, and/or sold by or on behalf of Lowe's and LGS in the Eastern District of Texas, and the accused Lowe's and LGS lighting products have been, and continue to be, used in the Eastern District of Texas. Lowe's and LGS, directly and/or through their agents and intermediaries, have placed the lighting products at issue in this lawsuit into the stream of commerce throughout the United States through established distribution channels, with the expectation and/or knowledge that they will be offered for sale, sold, and used in the State of Texas and in this judicial district. Without limiting the foregoing, Lowe's and LGS distribute

infringing lighting products throughout the United States through a regional distribution center network that includes a distribution center located in Mount Vernon, Texas.

12. Lowe's and LGS sell and offer for sale infringing LED lighting products in retail stores in the State of Texas and throughout this judicial district, including at sixteen Lowe's Home Improvement retail stores in this judicial district. For example, these retail stores currently sell and/or offer for sale such infringing LED lighting products the Utilitech Pro 24-in Strip Light and the Utilitech Pro LED Bulb.

13. Lowe's and LGS have participated in patent-infringement lawsuits in judicial districts throughout the United States, including in the Eastern District of Texas.

THE PATENT-IN-SUIT

14. U.S. Patent No. 8,530,250, entitled "Light Emitting Device, Resin Package, Resin-Molded Body, and Methods for Manufacturing Light-Emitting Device, Resin Package and Resin-Molded Body," was duly and lawfully issued by the U.S. Patent and Trademark Office on September 10, 2013. A true and correct copy of the '250 Patent is attached as Exhibit A.

15. The '250 Patent lists Hirofumi Ichikawa, Masaki Hayashi, Shimpei Sasaoka, and Tomohide Miki as inventors.

16. Nichia is the owner of the '250 Patent by valid assignment from the inventors. Nichia owns all rights, title, and interest in the '250 Patent, including the right to sue for and recover all past, present, and future damages for infringement of the '250 Patent.

17. The Abstract of the '250 Patent provides as follows:

Provided is a simple and low-cost method for manufacturing, in a short time, many light emitting devices wherein adhesiveness between a leadframe and a thermosetting resin composition is high. The method for manufacturing the light emitting device having a resin package (20) wherein the optical reflectivity at a wavelength of 350-800 nm after thermal curing is 70% or more and a resin section (25) and a lead (22) are formed on substantially a same surface on an

outer surface (20 *b*) has: a step of sandwiching a leadframe (21) provided with a notched section (21 *a*) by an upper molding die (61) and a lower molding die (62); a step of transfer-molding a thermosetting resin (23) containing a light-reflecting substance (26), in a molding die (60) sandwiched by the upper molding die (61) and the lower molding die (62) and forming a resin-molded body (24) on the leadframe (21); and a step of cutting the resin-molded body (24) and the leadframe (21) along the notched section (21 *a*).

THE EVERLIGHT LITIGATION

18. In 2013, Nichia filed an action for patent infringement in this Court against Everlight Electronics Co., Ltd. and Everlight Americas, Inc., and others (collectively, “Everlight”) styled *Nichia Corp. v. Everlight Elecs. Co., Ltd. et al.*, No. 2:13-cv-702-JRG (E.D. Tex.), *appeals docketed*, Nos. 16-1585, 16-1618 (Fed. Cir.) (the “Everlight Litigation”). In the Everlight Litigation, Nichia accused, *inter alia*, Everlight’s 45-21S, 62-257D and 62-217D series products of infringing claims 17, 19, and 21 of the ’250 Patent.

19. The Everlight Litigation was tried in this Court from May 11 to 13, 2015, before the Honorable J. Rodney Gilstrap. The Court issued a Memorandum and Opinion in the Everlight Litigation on January 25, 2016 (the “Memorandum”), a true and correct copy of which is attached hereto as Exhibit B. Among other things, the Court found that the accused products infringe the asserted claims of the ’250 Patent, and that Everlight had not shown the asserted claims to be invalid.

20. In the Everlight Litigation, the Court construed limitations in claims 1, 17, 19, and 21 of the ’250 Patent as follows:

i. The Preambles of Claims 1 and 17 are Claim Limitations

[FF38] In its Claim Construction Memorandum Opinion and Order (Dkt. No. 79), this Court determined that the preambles of claims 1 and 17 are claim limitations. (Claim Construction Order, Dkt. No. 79, at 53-54.) “[T]he entirety of the ’250 patent reveals that the preamble language relating to ‘light emitting device’ does not state a purpose or an intended use of the invention, but rather discloses a fundamental characteristic of the claimed invention that is properly construed as a limitation of the claim itself.” (Claim Construction Order, at 54 (“[T]he preamble language gives life, meaning and vitality to the claims by making it clear that claim 17 is directed to a light emitting device and claim 1 is directed to a method for manufacturing a light emitting device.”).)

ii. “Lead”

[FF39] Claims 1, 17, 19, and 21 of the ’250 patent include the term “lead.” This Court construed “lead” as “the portion of the device that conducts electricity.” (Claim Construction Order, at 57.) Although a lead must conduct electricity, “this does not foreclose the recited ‘lead’ from performing other functions in addition to conducting electricity.” (Id.)

iii. “A Portion of the Resin Part is Disposed Over a Portion of the Plating on the Upper Surface of the at Least One Lead”

[FF40] Claim 17 of the ’250 patent requires that “a portion of the resin part is disposed over a portion of the plating on the upper surface of the at least one lead,” which was construed to mean “a portion of the resin part is located over a portion of the plating on the upper surface of the at least one lead.” (Claim Construction Order, at 64.) This Court rejected Defendants’ contention that claim 17 “allows for all of the resin part to be disposed over all of the plating on the upper surface of the at least one lead.” (Id. at 63-64 (“A portion is not ‘all’ as Defendants contend.”).)

iv. “Notch”

[FF41] Claim 1 of the ’250 patent requires providing a lead frame having at least one “notch.” This Court construed the term “notch” to mean “an opening that penetrates the lead frame.” (Claim Construction Order, at 66-67.)

v. “Cutting the Resin-Molded Body and the Plated Lead Frame Along the at Least One Notch”

[FF42] Claim 1 recites the step of “cutting the resin-molded body and the plated lead frame along the at least one notch,” which this Court determined should be given its plain and ordinary meaning. (Claim Construction Order, at 67-69.)

vi. “Planar”

[FF43] Claims 1 and 17 require that an outer surface of at least one lead and an outer surface of the resin part are “planar.” This Court construed “planar” to mean “in a substantially same plane.” (Claim Construction Order, at 69-72.) The construction of “planar” does not require that the “leads and outer surface of the resin package to be perfectly flat.” (Claim Construction Order, at 71.)

Memorandum at 16-18.

21. In the Everlight Litigation, the Court found that the 45-21S, 62-217D, and 62-257D series products contain all of the limitations set forth in claims 17, 19, and 21 of the ’250 Patent. Specifically, with the Court held as follows:

[FF83] The Court finds that all of the claim limitations of Claim 17 of the ’250 patent exist in and are met by the accused 62-217D and 62-257D series products. . . .

[FF92] The Court finds that all of the claim limitations of Claim 19 of the ’250 patent exist in and are met by the accused 62-217D and 62-257D series products. . . .

[FF94] The Court finds that all of the claim limitations of Claim 21 of the ’250 patent exist in and are met by the accused 62-217D and 62-257D series products. . . .

[FF96] The Court finds that all of the claim limitations of Claim 17 of the ’250 patent exist in and are met by the accused 45-21S series products. . . .

[FF107] The Court finds that all of the claim limitations of Claim 19 of the ’250 patent exist in and are met by the accused 45-21S series products. . . .

[FF109] The Court finds that all of the claim limitations of Claim 21 of the ’250 patent exist in and are met by the accused 45-21S series products. . . .

Memorandum at 27-33.

22. In the Everlight Litigation, the Court also found that the “Nichia products covered by the ’250 patent (i) have received industry recognition, (ii) satisfy a longstanding but unmet need, and (iii) have achieved commercial success,” and that “[t]he features of the products in [Nichia’s] 757 series are included in the asserted claims of the ’250 patent, and these features in turn have contributed to the products’ commercial success.” Memorandum at 50. Specifically, the Court found:

[FF175] A 2013 article in *LEDinside* publication reported on industry praise and recognition for Nichia’s 757 product, stating that Nichia’s 757 series “ignited” the “expansion trend in that category.” (PTX829 (“2013 Review EMC Production Expansion Could Mean Trouble for PCT”).)

[FF176] Moreover, the industry had experienced a long-felt but unmet need for an alternative to incandescent lighting technology. Incandescent lights consume large amounts of energy for a given output of light, and the alternative that followed – fluorescent lighting – contains toxic components. With the advent of Nichia’s 757 series and related products, “there is the availability of low-cost devices that emit a significant amount of light that can be used in light bulbs and emit a pleasant, low-cost light.” []

[FF177] Between 2010 and 2013, Nichia’s sales of the products that practice the ’250 patent increased from three percent of Nichia’s total sales volume, to 27 percent. In 2013, Nichia sold over 13.9 billion units, with revenues of \$1.7 billion. [] The 757 series products themselves showed a similar increase, from 25 million units in 2011 to 2.5 billion units in 2013. In the eight months from January to August 2014, Nichia sold nearly 2.7 billion units of the products in the 757 series. []

[FF178] Although the products in Nichia’s 757 series are advertised and marketed as having an “EMC” (thermosetting resin-type) package, the overall structure and design of the package is important to consumers. The products in the 757 series are brighter, they have a long life, they are reliable, they have a low cost, and they can be fabricated quickly to meet customer demand. [] The brightness relates to (i) the resin, (ii) the plated lead frame, and (iii) the fact that the design allows for thin package walls, which allows for better emission of light (for example, by mounting a larger chip). [] The long life and reliability are attributable to the thermosetting resin (which does not discolor in the presence of light), a heat-resistant package design, and a notch in the lead frame that contributes to the package’s adhesiveness. In addition, by plating the lead frame

before molding, Nichia avoids possible contamination to bonding sites that can reduce the reliability of the bonding process. [] The design and manufacturing process contribute to low cost by allowing Nichia to make many more packages at once. Prior industry practice was to make about 100 packages per lead frame; Nichia makes approximately 2,400 packages per lead frame of its 157 product, and 1,200 packages per lead frame of its 757 product. [] Finally, the advanced manufacturing process allows Nichia to respond quickly to customer orders. []

Memorandum at 48-50.

23. In the Everlight Litigation, the Court concluded that Everlight's 45-21S, 62-257D and 62-217D series products infringe claims 17, 19, and 21 of the '250 Patent under 35 U.S.C. § 271(a). *See* Memorandum at 114-15.

DEFENDANTS' INFRINGING CONDUCT

24. Lowe's and LGS import into the United States, and sell, and/or offer for sale in the United States, LED lighting products that incorporate LED devices that, insofar as relevant to the limitations of the asserted claims, have the same features and are manufactured by the same process as the Everlight LED products that were held to infringe the '250 Patent in the Everlight Litigation. By way of example only, Lowe's and LGS's Utilitech Pro 24-in Strip Light ("Utilitech Strip Light") and the Utilitech Pro LED Bulb ("Utilitech LED Bulb") contain LED devices that, insofar as relevant to the claim limitations and as is apparent from their structure, have the same features as, for example, Everlight's 45-21S, 62-257D and 62-217D series products that were held in the Everlight Litigation to infringe claims 17, 19, and 21 of the '250 Patent.

25. Specifically, by way of example only, the LED devices in the Utilitech Strip Light have the same features as Everlight's 45-21S, 62-257D and 62-217D series products that were found in the Everlight Litigation to infringe claim 17 of the '250 Patent insofar as those features are relevant with respect to the claim elements. The LED devices found in Lowe's and LGS's

Utilitech Strip Light are light emitting devices that include a resin package comprising a resin part and at least one lead. In addition, the LED devices found in the Utilitech Strip Light include an outer surface of the resin part and an outer surface of the at least one lead that are planer at an outer surface of the resin package. The LED devices in the Utilitech Strip Light also include a plating disposed on an upper surface and a lower surface of the at least one lead, and an outer side surface of the at least one lead that is unplated. These LED devices include a portion of the resin part disposed over a portion of the plating on the upper surface of the at least one lead. The LED devices in the Utilitech Strip Light also include the element of claim 19 of the '250 patent – *viz.*, at least one lead comprises a step on a bottom surface or outer surface. Likewise, the LED devices in the Utilitech Strip Light also include the element of claim 21 of the '250 patent – *viz.*, at least one of the leads comprises two or more different levels.

26. Similarly, also by way of example only, the LED devices in the Utilitech LED Bulb have the same features as Everlight's 45-21S, 62-257D and 62-217D series products that were found in the Everlight Litigation to infringe claim 17 of the '250 Patent insofar as those features are relevant with respect to the claim elements. The LED devices found in the Lowe's LGS Utilitech LED Bulb are light emitting devices that include a resin package comprising a resin part and at least one lead. In addition, the LED devices found in the Utilitech LED Bulb include an outer surface of the resin part and an outer surface of the at least one lead that are planer at an outer surface of the resin package. The LED devices in the Utilitech LED Bulb also include a plating disposed on an upper surface and a lower surface of the at least one lead, and an outer side surface of the at least one lead that is unplated. These LED devices include a portion of the resin part disposed over a portion of the plating on the upper surface of the at least one lead. The LED devices in the Utilitech LED Bulb also include the element of claim 19 of the

'250 patent – *viz.*, at least one lead comprises a step on a bottom surface or outer surface. Likewise, the LED devices in the Utilitech LED Bulb also include the element of claim 21 of the '250 patent – *viz.*, at least one of the leads comprises two or more different levels.

27. Lowe's and LGS, directly and/or through intermediaries and agents, import into the United States, and sell, and/or offer for sale in the United States, including in this judicial district, lighting products, such as the Utilitech Strip Light and Utilitech LED Bulb, that incorporate the infringing LED devices.

COUNT I
(Infringement of U.S. Patent No. 8,530,250)
(35 U.S. C. § 271(a))

28. Nichia repeats and re-alleges each and every allegation of paragraphs 1-27 as if fully set forth herein.

29. The '250 Patent is valid and enforceable.

30. By its importation into the United States, and sale and/or offer for sale in the United States, of lighting products that incorporate infringing LED devices, including but not limited to, for example, the Utilitech Pro 24-in Strip Light and the Utilitech Pro LED Bulb, Lowe's and LGS have been and are now infringing at least claims 17, 19, and 21 of the '250 Patent, in the State of Texas, in this judicial district, and elsewhere, in violation of 35 U.S.C. § 271(a).

31. Lowe's and LGS's actions are without the consent of Nichia.

32. Nichia has been and will continue to be damaged by Lowe's and LGS's infringement of the '250 Patent.

33. Nichia has been and will continue to be irreparably harmed unless the Defendants' infringement of the '250 Patent is enjoined.

JURY DEMAND

34. Nichia hereby requests a trial by jury pursuant to Rule 38 of the Federal Rules of Civil Procedure.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff Nichia Corporation prays that the Court enter judgment against Defendants Lowe's and LGS, and in favor of Nichia, as follows:

- A. Finding that the '250 Patent was duly and lawfully issued, and is valid and enforceable.
- B. Finding that Lowe's and LGS have infringed one or more of the claims of the '250 Patent;
- C. Awarding damages to Nichia in accordance with 35 U.S.C. § 284, including pre-judgment and post-judgment interest, to compensate Nichia for Lowe's and LGS's infringement of the '250 Patent;
- D. Ordering preliminary and permanent injunctive relief restraining and enjoining Lowe's and LGS, as well as their officers, agents, attorneys, employees, and those acting in privity or active concert with them, from infringement of the '250 Patent for the full term thereof;
- E. Finding that this case is exceptional pursuant to 35 U.S.C. § 285;
- F. Awarding Nichia its costs and attorneys' fees; and
- G. Awarding Nichia such other and further relief as this Court deems just and proper.

DATED: June 13, 2016
